Able # 5 Part # 4217

Description Able #5 is a paintable one-step polish for use in body shops. Cleans and shines in one operation. Able #5 produces a deep, lasting luster on fresh paint and does it without dusting or chatter. Removes fine scratches, medium oxidation, blemishes, water spots and more. Compare to our top selling polish, Seal B, in a body shop safe formula! Avoid potential problems when working in OR near a body-shop environment, use a body shop safe solution.

Key Features:

- Designed for use with a high-speed or dual-action buffer
- Contains an ultra, high gloss polishing agent, smooth all the way through
- Produces a wet-look shine without wax or silicone
- Easy to clean up
- Adds revitalizing nutrients to the paint
- Buffing residue wipes off easily
- Clean to work with, less dust
- Can be applied to fresh paint with a wool pad

Directions:

Shake well. Apply in the shade to a cool surface. Use a high speed or dual-action buffer and a new foam pad (on new paint) (1500-2500 rpm) or a new wool pad (on older paint). Apply to one section at a time and buff starting at slow speed and work up to higher speeds. Work in until a high gloss appears and the product is almost dry. Wipe off excess with a soft, dry terry cloth or micro-fiber towel.

Precaution:

Wear rubber gloves to prevent drying of the skin and possible irritation. NIOSH approved dust mask and goggles are recommended. Always refer to product label and Material Safety Data Sheet (MSDS) before using.

Available Sizes: gallons and quarts
